**News Release**

## Lane closures planned for two bridges in Lake County

LAKE COUNTY, Ind. - Indiana Department of Transportation contractor Superior Construction Co will begin two bridge deck overlay projects on or after Monday, May 16.

U.S. 12/Columbus Drive over Kennedy Ave will be reduced to one lane in each direction through early August, and 169th Ave/15th Ave over State Road 912/Cline Ave will be reduced to one lane in each direction through mid-September.

The outside right lanes will be closed in each direction during phase one, and the inside left lanes will be closed during phase two for both projects. Bridge deck overlays are preventative maintenance projects that prolong the life of the bridge.

INDOT encourages drivers to allow extra time when driving through this area and follow traffic directions carefully. Motorists should slow down, exercise caution and drive distraction-free through all work zones.
